Attention: Hugh Jernigan
Waste Management Specialist

Reference: Facility Compliance Audit Report Follow-up
White Street Landfill, Permit No. 41-03
Guilford County

Dear Mr. Jernigan:

As a follow-up to the facility compliance audit conducted at the White Street Landfill on May 19, 2010, the City of Greensboro is pleased to address issue number 30. Enclosed is a schematic depicting the Phase II unit's active, partially closed, and previously closed sanitary landfill areas. The previously closed sanitary landfill areas were completed in accordance with the 1998 compliance order and as cooperative effort during the initial agreement with the Division during the development of the "piggy-back" operations.

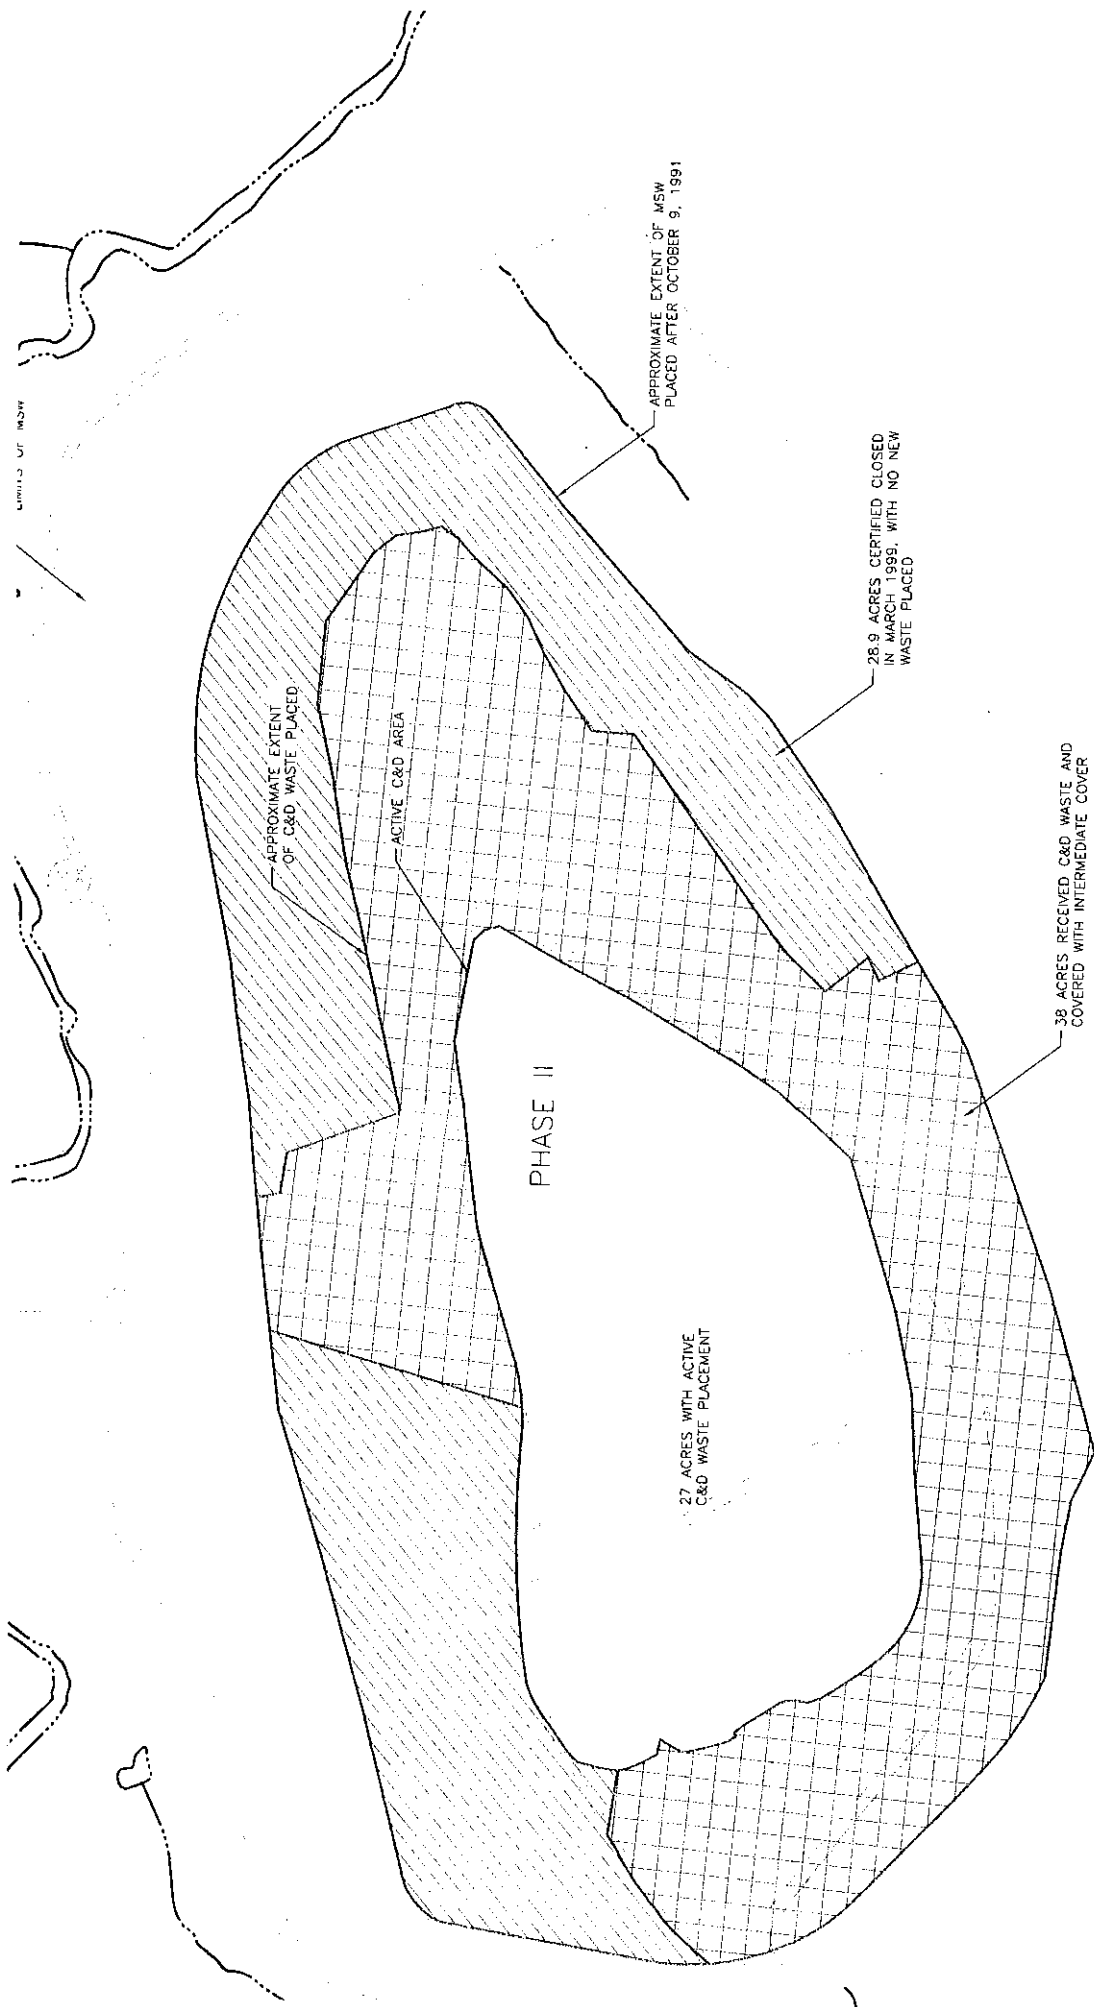

Per previously issued permits applications, construction and demolition placement occurred in three stages along the southeastern- easterly regions of the Phase II area. Waste placement migrated toward the interior of the landfill, filling in the low valleys and around the landfill gas collection system. Based upon aerial photographs, final contours for some portions of the unit were met in 2000-2001. Intermediate cover is currently placed within these areas and minimal activities (e.g., land quality enhancements) have occurred since achieving these contours.

Please let me know if additional information is needed or whether additional inquiries remain in order to complete your compliance audit activities.

Sincerely,

Jeryl W. Covington, P.E.
Director, Environmental Services
